Screen 6 — Action Complete!

User Testing Tasks for Next Week

TASK 1 — Daily Challenge Flow

Imagine it's Monday morning. You just downloaded ClimateAction. From the home screen, find today's daily challenge, read what it asks you to do, and accept it. Tell me how confident you'd feel actually completing it today.

→ Tests: discoverability of daily challenge, clarity of instructions, motivation to commit

TASK 2 — Track Your Weekly Impact

After completing a few actions, you want to see how much CO_2 you've saved this week. Find your weekly progress chart, identify your best day, and locate at least one achievement badge you've earned.

→ Tests: navigation between tabs, chart readability, sense of accomplishment

TASK 3 — Join a Group Challenge

Your friend Alex is doing a "Plastic-Free Week" challenge and you want to join them. Navigate to the community section, find the group challenge, and join it. Then describe what you expect will happen next.

→ Tests: social/community feature discovery, group action mechanics, expectations of follow-up
